SECPRO AFRICA LTD is the first Italian-Nigerian security & services company. Registration Certificate Number 1103651, incorporated in the date 21ST March 2013 and registered office at 25B, Colorado Close, Maitama, Abuja –FCT.

Our Company is an independent and international security and business risk consultancy focused on providing specialist support to defence, military and security organizations.

We are certified as professional supplier by UNITED NATIONS-Reg. 409743, NATO CAGE Reg. AH195, member of NTERPOL and IMO-International Maritime Organization.

SecPro SECURITY DIVISION

We work with our clients to minimize risk and maximize opportunity by meeting their exacting requirements in a timely and effective manner, and implement bespoke security and business risk solutions that are unique to each individual task or project. We provides business intelligence services, security consulting and risk management in areas of crisis.

Our specialist security consultants and support services assist businesses and governments in identifying and monitoring the specific threats surrounding an organization. We provide independent, holistic advice and support and oversee the creation of complete and comprehensive security management and risk mitigation strategies.

The advice we provide is based on our practical approach to identifying the correct risks, and reducing these risks to ensure that critical business functions remain operational and assets, profits, personnel and reputation remain intact. Even in the most challenging of environments, SECPRO AFRICA LTD can assess the current security risks facing an organization and review the security procedures that are being employed and provide relevant and technical advice and input to update and improve these measures.

We understand that every business and project is different, which is why our specialists are individually suited and carefully selected for specific tasks. We assist our clients to protect critical assets and infrastructure against risks posed by terrorism, political instability, challenging environments, disasters and crisis situations and enable organizations to prepare, react and respond accordingly to the security challenges they face.

SecPro OIL&GAS SECURITY

SecPro Africa Ltd understands the crucial importance of offering high quality security services to oil and gas companies, mining companies and other industrial services.

We know that pipeline security and other such security projects are crucial.

The talented and experienced team at SecPro can work with you to deliver the pipeline security services that you need. Our security and protection services include:

Static Guards

Static guards can be positioned at a pipeline, drill site or other such industrial site to ensure that all tools, vehicles and other assets are safe and secure at all times.

Mobile Patrol Guards

Our mobile patrol security guards perform patrols of industrial sites and pipelines at irregular times to ensure that their motions and schedule cannot be tracked by potential criminals. We use helicopters and UAVs

Bodyguard Services

We protect a wide variety of individuals including CEOs, company presidents, politicians and other high-profile Individuals at conferences, meetings and job sites.

Other security services

Our *pipeline security* teams can also perform searches, be responsible for access control, handle crowd control duties and much more.

The security team at SecPro understands the many stakeholders that are involved in any pipeline or other such project. We work with mining companies, oil and gas companies and other such groups to ensure that cultural, environmental and other important concerns are always addressed by our team. SecPro provides cost-effective, round-the-clock security leak detection and condition monitoring of assets such as pipelines and site perimeters using standard telecommunications fiber optic cable.

SecPro LOGISTICS DIVISION

The transfer of personnel and material from one location to another, as well as the maintenance of that material — is essential for a military to be able to support an ongoing deployment or respond effectively to emergent threats. SecPro Africa Ltd has long provided guidance and effective solutions to military supply and logistics decision makers, resulting in significant savings, improved readiness and combat support, and unit flexibility.

SecPro Africa Ltd prides itself on our ability to offer advanced logistics & supply chain solutions and services that bring value to our diverse client base. Our logistics management experience spans across organizations in military, government and commercial arenas that allows SecPro the ability to provide diverse industry solutions backed by experienced logistics professionals. Clients have come to recognize the value that SecPro can bring to their bottom line and improved operational efficiency, either through service enhancement or cost containment.

Our customized logistic solutions are aligned with your organizational objectives and flexible enough to provide a dynamically changing supply chain that feeds continuous value.

Our Logistic Management services provide the flexibility and service diversity that enables effective management of the entire supply chain all backed by practiced logistics techniques and methodologies.

SecPro Africa Ltd has extensive experience with the following aspects of military operations that deal with:

SecPro CYBER SECURITY

Cyberspace and its underlying infrastructure are vulnerable to a wide range of risk stemming from both physical and cyber threats and hazards. Sophisticated cyber actors and nation-states exploit vulnerabilities to steal information and money and are developing capabilities to disrupt, destroy, or threaten the delivery of essential services.

Our daily life, economic vitality, and national security depend on a stable, safe, and resilient cyberspace.

Cyberspace and its underlying infrastructure are vulnerable to a wide range of risk stemming from both physical and cyber threats and hazards. Sophisticated cyber actors and nation-states exploit vulnerabilities to steal information and money and are developing capabilities to disrupt, destroy, or threaten the delivery of essential services. A range of traditional crimes are now being perpetrated through cyberspace. This includes the production and distribution of child pornography and child exploitation conspiracies, banking and financial fraud, intellectual property violations, and other crimes, all of which have substantial human and economic consequences.

SecPro Africa Ltd integrates state-of-the-art technology with industry insight to provide round-the-clock business-focused operational security.

Adopting an intelligence-led approach to managing cyber risk is key to building cyber resilience. By identifying the relevant, current and emerging threats to your organization, you can proactively identify and mitigate incoming attacks.

For many organizations, gathering and analyzing the many internal and external sources to get relevant, specific and actionable information is like finding a needle in a haystack: time-consuming, resource-intensive and inefficient.

SecPro Africa Ltd has been developed to help you make more intelligent decisions. Working alongside organizations to contextualize the threat to their business, we focus their attention on the right place at the right time to spot the telltale signs of an attack before it turns into a crisis.

DOG K-9 SECURITY

Our company gathered canine experts, French former soldiers, are all highly trained professionals. They are able to provide and train K9 teams specialized in any hostile environment. We prospect, prepare and select dogs for overseas delivery with its clients in mind.

Pedigree dogs, Belgian and German shepherds, selected for their physical qualities, we have only the best selection criteria. The dog must satisfy various examinations: medical, morphological and character. They must be balanced and sociable towards their handlers.

We offer top-quality skilled detection dogs (explosive ,narcotics, gun & ammunition, IED)

Our training methods are based on European Standard Military-Police

International Airport Authority procedures

Our dogs are being trained on real & home-made explosives

Dogs are in top medical shape & good physical qualities.

Our type of training is meant to sustain and enhance the performance of the handler and canine and their ability to work together as a team.

In training, situations are purposely sought where the capabilities of the canine team are challenged in environments which simulate those in which the team may be deployed. excellent ratio of detection to false alarms .

Our canine team shall conduct regular objective-oriented training sessions sufficient to maintain operational proficiency.
